

## COVID-19 Patient Policy

For those patients with significant exposure to COVID or a current case of COVID, we ask you to undertake a telehealth visit if appropriate or wait 5 days from onset of symptoms or positive testing before coming into the office. **If you are in our office from day 6 to 10 after a COVID diagnosis, please let the front office staff know you have recently been diagnosed with COVID and remained masked for the entirety of the visit while in our office.** If the provider feels you must be seen within the initial 5-day COVID window, the provider may make other arrangements for you to be seen. This may include recommending you be seen in the hospital.

**Patients are asked to reschedule their visit or move to a telehealth visit if they have:**

- COVID-19 exposure risk in the last 5 days
- Tested positive for COVID-19 in the past 5 days
- Pending COVID-19 test results
- Fever (temperature greater than 100.0)
- Respiratory symptoms from COVID, flu, RSV, or other illness
- New onset loss of taste or smell

## Visitor Policy

Due to limited space in our waiting rooms, we ask that all patients respectfully come alone to their appointments when possible.

**Obstetric patients:** Patients are allowed to have 1 guest accompany the patient to their appointment, including ultrasounds. Please limit additional guests due to lack of space.

**For more information regarding COVID-19 and pregnancy, please see our ACOG FAQ patient education sheet located under our Health Library tab.**
